

Impact for Geography

At St. George's Primary, the impact of quality first teaching in Geography will foster a love and enthusiasm for the subject.

Our Geography curriculum is measured in a variety of ways:

- questioning during lesson time,
- feedback during the lesson,
- listening to child-led discussion,
- interviewing pupils across the school about their learning,
- book looks and using images/videos of children's practical learning.

By end of their Primary experience at St George's, our pupil's will:

- Know where places are and what they are like.
- Knowledge of the world and their place in it.
- Understanding the ways in which places are interdependent and interconnected and how much human and physical environments are interrelated.
- Increasing use of geographical vocabulary.
- Discover more about the world, through reading, travel or the media.
- Know that they can use their voice to express themselves and their opinions.
- Knowledge and skills will have developed progressively to not only enable them to meet the requirements of the National Curriculum but to prepare pupils to become competent geographers in secondary education.

We want pupils to have thoroughly enjoyed learning about geography, therefore encouraging them to undertake new life experiences now and in the future.
